SUMMARY

Final-year B.Tech CSE (Artificial Intelligence and Machine Learning) student at Vellore Institute of Technology, Bhopal with expertise in machine learning libraries. Proven ability to deploy production-ready AI solutions and eager to contribute to product-focused AI development . Japanese in Japanese NAT N5

EDUCATION

- **Vellore Institute of Technology(VIT),** Bhopal, MP
B.Tech in Computer Science; CGPA: 7.78 *Oct. 2022 – Jun. 2026*

SKILLS

- **Languages:** Python, SQL, Java (Basic)
- **Tools** : Git, GitHub, Jupyter Notebook, VS Code
- **AI/ML** : Machine Learning, Classification, Regression, Feature Engineering, Data Preprocessing

PROJECTS

- **AI-Powered Medical Triage System:**
 - Developed a machine learning-based medical triage system to classify patient severity
 - Achieved 87% classification accuracy through feature engineering and model optimization
 - Evaluated model performance using precision, recall, F1-score, and cross-validation
 - Designed the system with scalability and real-world deployment considerations

- **ESTA – AI-Based Construction Budget Planner (Ongoing):**
 - Developed regression-based machine learning models for location-wise construction cost estimation
 - Enabled data-driven budgeting through accurate and scalable cost predictions
 - Applied interpolation techniques to improve real-time budget forecasting accuracy
 - Designed the system for seamless integration with frontend applications
- **Zentry – Secure Stablecoin Transaction Platform:**
 - Developed backend services for secure digital transactions with reliability and compliance
 - Implemented fraud detection logic and regulatory checks within transaction workflows
 - Designed scalable APIs and containerized services for efficient deployment
 - Built analytical dashboards to monitor transaction patterns and system performance
